COURSE OVERVIEW

This course provides participants with the knowledge, tools and practical skills to plan and conduct marine casualty investigations in a professional, systematic and impartial manner. It aligns with international standards including the IMO Casualty Investigation Code (MSC.255(84)) and promotes a safety culture aimed at preventing recurrence of marine incidents.

WHO SHOULD ATTEND?

Maritime professionals from administrations, maritime agencies, navy, marine police, shipping companies, ports, oil & gas operators, insurers and other stakeholders involved in marine safety and incident response.

COURSE OBJECTIVES

- ✓ Understand the principles and purpose of marine casualty investigation.
- ✓ Learn the legal and regulatory framework governing investigations.
- ✓ Apply a systematic approach to planning and conducting investigations.
- ✓ Collect, preserve and analyze evidence effectively.
- ✓ Determine causal and contributing factors.
- ✓ Prepare clear, factual and impartial investigation reports.
- ✓ Formulate safety recommendations to prevent future occurrences.

KEY TOPICS

- Overview of Marine Casualty Investigation
- Legal and Regulatory Framework
- Investigation Process and Methodology
- Evidence Collection and Management
- Analysis: Causal & Contributing Factors
- Report Writing and Safety Recommendations
- Case Studies and Practical Exercises
